

SMART LIFTER LC & LP FEATURE SHEET

For Vehicle Compatibility, download our list at

<https://www.mobilityinnovators.com/products/lifts-and-transfer-solutions/smart-lift/>

Flexibility and Mobility!

- Take a scooter or wheelchair anywhere
- Multiple Lifting Brackets available to fit a wide variety of manual wheelchairs, scooters and powerchairs
- Everything is mounted and loaded inside the vehicle, keeping the mobility scooter out of the elements during travel
- Features motors for up/down lift, as well as in/out movement at the touch of a button

The Smart Lift is our in-vehicle lift solution that does all the work of loading your scooter or wheelchair into most vans or SUVs.

- Comes in three weight ratings able to lift up to 220lbs (LC), 275lbs (LP) and 440lbs (LP)
- Each A-frame Fitting Kit is designed specifically for the vehicle frame to ensure safe and secure use, and retain as much back row seating as possible
- Ideal for most mid size, full size SUVs, or vans
- Smart Lift arm can be removed to free up cargo area when needed (A-Frame Fitting Kit cannot be removed)

Is the Smart Lift right for your client?

- In some cases, the scooter/powerchair seat will have to be folded down or removed for loading
- Actual safe lift weight rating will be determined by the specific vehicle Fitting Kit
- Specific vehicle Fitting Kits are mounted to the vehicle frame, and should be considered permanent unless removed by a certified technician
- Unlike other lifts on the market, the spare tire is still accessible after install
